Important Information

Based on the fund's portfolio returns as at 30 September 2020, the Volatility Factor (VF) for this Fund is 1.86 and is classified as very low (source: Lipper). Very low includes funds with VF that are above 0.00 but not more than 3.64. The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

This document is for information only and does not constitute investment advice or a recommendation and was prepared without regard to the specific objectives, financial situation or needs of any particular person who may receive it. Any research and analysis contained in this presentation has been procured by Franklin Templeton for its own purposes and may be acted upon in that connection and, as such, is provided to you incidentally. Data from third party sources may have been used in the preparation of this material and FT has not independently verified, validated, or audited such data. Any views expressed are the views of the fund manager and do not constitute investment advice. The underlying assumptions and these views are subject to change. Franklin Templeton accepts no liability whatsoever for any direct or indirect consequential loss arising from the use of any information, opinion or estimate herein. The value of investments and the income from them can go down as well as up and you may not get back the full amount that you invested. Past performance is not an indicator nor a guarantee of future performance.

Any prediction, projection or forecast on the economy, stock market, bond market or the economic trends of the markets is not necessarily indicative of the future or likely performance.

Application for units of the Fund can only be made upon receipt of an application form referred to and accompanying a copy of the Prospectus of the Fund dated 18 November 2016, as may be amended and supplemented from time to time, which has been registered with the Securities Commission, Malaysia. This does not amount to nor indicate that the Securities Commission Malaysia recommended or endorsed the Fund. A copy of the Prospectus and the product highlights sheet are available from Franklin Templeton GSC Asset Management Sdn. Bhd. or its authorized distributors. Investors have the right to request for a copy of the product highlights sheet. Investors are advised to read and understand the contents of the Prospectus and the product highlights sheet before investing. This document has not been reviewed by Securities Commission Malaysia. Among others, the investors should consider the fees and charges involved. The price of units and distributions payable, if any, may go down as well as up and you may not get back the full amount you invested. Past performance is not indicative of future performance. An investment in the Fund entails risks which are described in the Prospectus and product highlights sheet. When investing in a fund denominated in a foreign currency, performance may also be affected by currency fluctuations.

In emerging markets, the risks can be greater than in developed markets.

This document does not constitute the distribution of any information or the making of any offer or solicitation by anyone in any jurisdiction in which such distribution or offer is not authorized or to any person to whom it is unlawful to distribute such a document or make such an offer or solicitation. Investors may wish to seek advice from a professional advisor before making a commitment to invest in units of the Fund. In the event an investor chooses not to, he/ she should consider whether the Fund is suitable for him/ her.

Performance: Past performance is not an indicator or a guarantee of future performance. All performance data shown is in the currency stated, include reinvested dividends and are net of management fees. Sales charges and other commissions, taxes and other relevant costs paid by the investor are not included in the calculations.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Source for Refinitiv Bond Pricing Agency Malaysia (BPAM) 3-7 year Sukuk Index: Refinitiv. Indexes are unmanaged, and one cannot invest directly in an index.

Top Ten Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the investor should not assume that investment in the securities listed was or will be profitable. Holdings are subject to change. The portfolio manager reserves the right to withhold release of information with respect to holdings that would otherwise be included in the top holdings lists.

Fund Measures: The average credit quality (ACQ) rating may change over time. The portfolio itself has not been rated by an independent rating agency. The letter rating, which may be based on bond ratings from different agencies (or internal ratings for unrated bonds, cash and equivalents), is provided to indicate the average credit rating of the portfolio's underlying investments and generally ranges from AAA (highest) to D (lowest). For unrated bonds, cash and equivalents, ratings may be assigned based on the ratings of the issuer, the ratings of the underlying holdings of a pooled investment vehicle, or other relevant factors. The ACQ is determined by assigning a sequential integer to all credit ratings AAA to D, taking a simple, asset-weighted average of investments by market value and rounding to the nearest rating. The risk of default increases as a bond's rating decreases, so the ACQ provided is not a statistical measurement of the portfolio's default risk because a simple, weighted average does not measure the increasing level of risk from lower-rated bonds. The ACQ may be lower if cash and equivalents are excluded from the calculation. The ACQ is provided for informational purposes only. Derivative positions are not reflected in the ACQ.

Yield figures quoted should not be used as an indication of the income that has or will be received. Yield figures are based on the portfolio's underlying holdings and do not represent a payout of the portfolio.

Composition of Fund: References to particular industries, sectors or companies are for general information and are not necessarily indicative of a fund's holding at any one time.
